EXAMINER'S AMENDMENT

The amendment filed September 1, 2004 contains a typographical error. A hard return was omitted between the end of claim 24 and the beginning of claim 25. The examiner has reproduced claims 24 and 25 in the following examiner's amendment in order to avoid confusion and delay upon printing. Claims 24 and 25 have not been changed from the versions presented on September 1, 2004. The applicant is requested to review the following examiner's amendment for typographical accuracy.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

24. (previously presented) An optical system comprising, in combination, a projector for presenting an image, a screen having a rear side for receiving light from the projector and a viewing side opposite the rear side, the screen adapted to receive an image from the projector from the rear side of the screen and present it to a viewer from the viewing side of the screen, the screen having light absorbing means for absorbing ambient light, and

an adhesive associated with the screen for optically coupling the rear or viewing side of the screen to a substantially transparent window in a position capable of being viewed.

25. (original) A system according to claim 24 wherein the screen comprises a front projection screen.
